## TECHNICAL DATA

---

### USE AND APPLICATION

1170 is concentrated paraffin dispersant. It is excellent for use in hot oil treatments, hot water treatments, or batch treating applications.

1170 will help prevent deposition or paraffin or wax. It has also been used as a tank bottoms treater to break up bad oil problems.

1170 is a concentrate and should be diluted in xylene or other solvents. One drum of 1170 will make two or three drums of finished product.

Contact Lindon for more information on testing paraffin solvents and on using 1120 as a base material for formulating.

---

### TYPICAL PROPERTIES

Flash Point ..... 64°F  
Pour Point..... <-22°F  
Specific Gravity ..... 0.984-0.998  
Insoluble in Water  
Soluble in Xylene  
Soluble in Heavy Aromatic Solvent  
Appearance ..... Dark Amber liquid

---

### STORAGE AND HANDLING

**For Industrial Use Only.** Avoid prolonged or repeated contact with skin, eyes and clothing. Do **NOT** ingest. In case of contact with eyes flush with water for at least 15 minutes and get immediate medical attention. Refer to the MSDS for complete handling instructions. **Store away from open flame. Avoid strong oxidizers.**

#### DISCLAIMER OF LIABILITY

The information in this bulletin is believed to be accurate, however all recommendations are made without warranty, since the conditions of use are beyond LINDON'S control. The listed properties are illustrations only, and not product specifications. LINDON disclaims any liability in connection with the use of the information, and does not warrant against infringement by reason of the use of any of its' products in combination with any other material or in any process.
