
TECHNICAL DATA

USE AND APPLICATION

6125 is designed to be used as an emulsion breaker base or additive compatible with a wide range of other demulsifier intermediates.

This base is typically blended at activities of 30 to 40%, by itself, or with other bases to form a compound for a specific application.

6125 has been used very effectively in both production and refinery applications.

Lindon can provide information and assistance in developing demulsifier finished products.

TYPICAL PROPERTIES

Flash Point	160°F
Specific Gravity	0.970-1.020
Dispersible in Water	
Soluble in Isopropanol	
Soluble in Heavy Aromatic Solvent	
Appearance	Slightly hazy to clear, Amber liquid
RSN	12.5

STORAGE AND HANDLING

For Industrial Use Only. Avoid prolonged or repeated contact with skin, eyes and clothing. Do **NOT** ingest. In case of contact with eyes flush with water for at least 15 minutes and get immediate medical attention. Refer to the MSDS for complete handling instructions.

DISCLAIMER OF LIABILITY

The information in this bulletin is believed to be accurate, however all recommendations are made without warranty, since the conditions of use are beyond LINDON'S control. The listed properties are illustrations only, and not product specifications. LINDON disclaims any liability in connection with the use of the information, and does not warrant against infringement by reason of the use of any of its' products in combination with any other material or in any process.
