## TECHNICAL DATA

---

### USE AND APPLICATION

6195 is designed to be used as an emulsion breaker base or additive compatible with a wide range of other demulsifier intermediates. It is a unique phenolic resin ester.

This base is typically blended at activities of 30 to 40%, by itself, or with other bases to form a compound for a specific application.

6195 is designed to be used in both production and refinery applications. This type of blend was developed in the Middle-East and proved very effective.

Lindon can provide information and assistance in developing demulsifier finished products.

### TYPICAL PROPERTIES

Flash Point .....	95°F
Specific Gravity .....	.098-1.020
<b>Insoluble in Water</b>	
<b>Soluble in Isopropanol</b>	
<b>Soluble in Heavy Aromatic Solvent</b>	
Appearance .....	Slightly hazy, dark amber liquid
RSN .....	8.5

---

### STORAGE AND HANDLING

**For Industrial Use Only.** Avoid prolonged or repeated contact with skin, eyes and clothing. Do **NOT** ingest. In case of contact with eyes flush with water for at least 15 minutes and get immediate medical attention. Refer to the MSDS for complete handling instructions. **Store away from open flame. Avoid strong oxidizers.**

### DISCLAIMER OF LIABILITY

The information in this bulletin is believed to be accurate, however all recommendations are made without warranty, since the conditions of use are beyond LINDON'S control. The listed properties are illustrations only, and not product specifications. LINDON disclaims any liability in connection with the use of the information, and does not warrant against infringement by reason of the use of any of its' products in combination with any other material or in any process.
